

## METALCLAD series

All CHINT products are made to stand up to the wear and tear of everyday use, but in some areas you need them to be even tougher. That's why the METALCLAD series of surface mounted accessories is ideal for factories, workshops, garages and sheds. Made from heavy gauge steel they're tough and impact resistant and they look good too. There is a wide selection of surface mounted products in the range including switch sockets with outboard rockers and light switches with wide rockers, both very useful when wearing gloves.
